

**Essay:** Please imagine you are 60 years old and you are celebrating your birthday together with your family and friends. Suddenly your granddaughter jumps on your lap and asks the following question: "Grandmother/grandfather, yesterday you told me that you got your primary education from UgandaKids in Adjumani. But what have you done after your PLE until today?" Please describe what you **WOULD LIKE** to answer:

I luckily got support from Uganda Kids and I have completed my primary well, thereafter I went to St. Mary Assumpta Girls Secondary School and I completed it. After my completion I went to 'A' level and passed. I was told to join University, I joined and now I am a doctor.

I help the patients in the hospital and create my own clinic and employed some nurse to work in my clinic meanwhile I am a doctor helping in my previous school. Helping the sick pupils.

After some years I got married to a responsible man like me and we help each other in order to make others also come up like us.

We gave birth to our children and we educate them while helping others like the way we were helped by the Uganda Kids. I now thank the madam and the well-wishers for having helped me through my studies which I have undergone.

I make sure I educate my children meanwhile helping others like the way we were helped. I make sure I maintain my self health in order to stay longer in age.

And my parent who helped me in home activities and up to this extend I thank God to keep her and my aunt who helped me too.

Like the helped people, we don't want to make Uganda Kids fall down and still handle it properly and make it very good school with quality performance.

When I am still 60 years old, I would wish to improve the performance of Uganda Kids high and give out quality pupils with appreciation. May God bless the sponsors and the

madam who did the best of her self and thanked God to give the same people who will still have the best will for all. May God protect all of them.
